The overtime bill is rising

The punch record alone does not explain the increase.

THE SIX-MONTH SIGNAL

+23.5%

overtime earnings, April to September

Indus Weave's HR, attendance, overtime approvals, and payroll exports tell different stories. This review reconciles them into a daily attendance model and compares punch-computed overtime with what was approved and paid.

Punch overtime fell

-23.8%

Corrected punches vs payroll overtime units

DECISION FOR THE CFO

Introduce a monthly exception review before payroll close, then investigate the departments with the largest approval-to-punch gaps.

We rebuilt the trail from source to payroll

Every correction is in code; original exports remain unchanged.

01

Raw exports

12 files | 345k punches

02

Clean + reconcile

device mapping | dates | duplicates

03

Daily attendance

rosters | shifts | leave | holidays

04

Warehouse + SQL

10 business answers | DQ checks

ATTENDANCE ROWS

217,584

1,266 deduplicated employees

UNMAPPED PUNCHES

6,962

kept with a rejection reason

DEVICE CLOCK CORRECTION

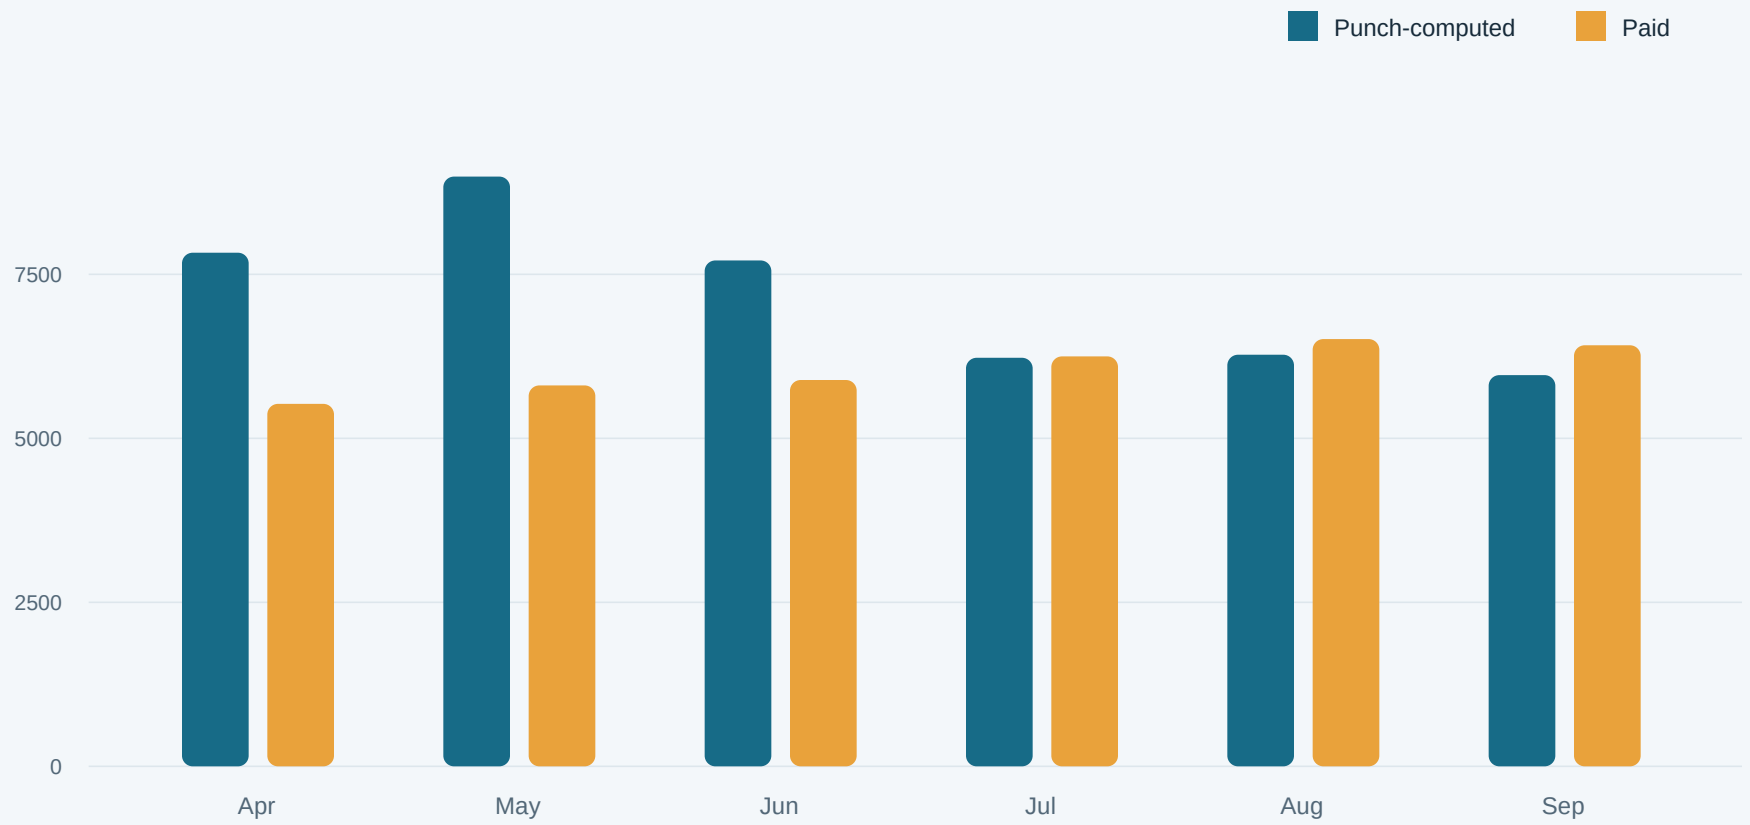
-60 min

DEV-SITE-01 clock was +60 min

Quality checks passed: raw load counts | keys | status values | referential lookups | reconciliation | SCD2 ranges

Paid overtime grew as recorded overtime fell

Monthly overtime hours from corrected attendance and payroll units.



Overtime earnings: PKR 2.81m to PKR 3.48m | +23.5%

Punch-computed overtime dropped 23.8% from April to September, while paid overtime hours rose 16.2%. The gap widened in the final three months.

Stitching is the clearest place to start

Six-month total: 7,659 paid hours vs 4,830 punch-computed hours.

PUNCH-COMPUTED

4,830 h

after clock and punch corrections

APPROVED + PAID

7,659 h

approval hours equal payroll units

THE GAP

2,829 h

paid hours are 58.6% higher

What to check in Stitching

- Match approved requests to corrected punch pairs and the rostered shift end.
- Look for recurring requests, approvals that exceed observed work, and staffing patterns.
- Five Stitching department-months exceed the 15% threshold; the gap reaches 141.3% in September.

Put a reconciliation gate before payroll close

A practical response that preserves operations and improves trust in the numbers.

1	**Reconcile monthly**	Compare computed, approved, and paid overtime by plant and department.
2	**Escalate exceptions**	Require a reason and secondary approval when paid exceeds computed by >15%.
3	**Review Stitching first**	Sample requests and punch pairs, then check staffing and shift coverage.
4	**Track the trend**	Report hours, PKR, exception count, and resolution each month.

Recommended next step: pilot the exception gate with Stitching in the next payroll cycle.

All figures are synthetic case-study outputs; confirm the assumptions during Q&A.
